

## Ecosystem Diorama and Research Report

Your group will create a diorama and research report about one of the following animals found in Alberta:

- woodland caribou
- whooping crane
- northern leopard frog
- badger

I would like each group to research and create a diorama for a different animal. You can have four people in group.

### Research Report

Your report will be how your animal meets its basic needs to survive. For example, what type of environment does your animal prefer? What type of food does it eat? How does it adapt to its environment?

### Diorama

Use a shoebox and art materials to make a diorama showing the basic needs of your study animal.

### Presentation:

Your group will present your report and diorama to the class.

# Ecosystems Report

The animal our group chose to do is:

---

## This image shows a blank sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

## This image shows a single sheet of white paper with horizontal ruling lines. The lines are evenly spaced and run across the width of the page. There are no margins, text, or other markings on the paper.

# 5 Things That Might Affect the Survival of the Animal

(small changes such as someone  
riding a bike through the animal's  
habitat or a large change such as  
drought)
